

# Drones in Education

expanding the education  
of our community

Thanks to the generosity of Orange and Rockland and their STEM Classroom Grants, the Rockland Teachers' Center will be offering opportunities for educators to get hands-on experience flying a drone, as well as, engage in discussions around where drones fit in the education landscape. There will be discussions on the ethical issues surrounding drone use as well. Participants will also gain knowledge of laws and regulations related to drone flight.

Using the drones purchased through the grants, participants will have an opportunity to fly a drone through a course and utilize the onboard video camera to record their flight or take still photos along the way.

Information will be available about some of the various drones being used in classrooms. There will also be discussions about how drones could be used in the various curricular areas represented by the participants.

**Sign up for a FREE 3-hour course using  
My Learning Plan.**

**October 17 & 24 OR January 16 & 30**

**Courses are scheduled to run from  
4:30pm to 6:00pm,**

**Building 10, Rockland BOCES**
